RISK ASSESSMENTS

Where Every Good Cybersecurity Defense Begins

Critical Risks Exposing SMBs to Cyberattacks

Cybersecurity threats come in all shapes and sizes and pose serious risks to businesses, big and small. Don't wait until it's too late to identify your greatest areas of risk.

69% of SMBs haven't identified cybersecurity threats

66% of SMBs haven't identified cybersecurity vulnerabilities

48% of SMBs haven't analyzed cybersecurity attack targets and methods

WHAT IS A RISK ASSESSMENT?

A risk assessment provides a big-picture snapshot of your current cyber risk exposure — revealing vulnerabilities and uncovering opportunities. **NetUtils** will help you:

- 1 IDENTIFY**
You can't fix what you can't see. A risk assessment can expose hidden security gaps.
- 2 PRIORITIZE**
Critical gaps affecting your business operations can be addressed immediately.
- 3 REMEDIATE**
A risk assessment can drive strategic, long-term cybersecurity defense measures.

WHAT YOU CAN EXPECT:

- Scoring on ten security health data and risk factors
- Vulnerability scan for known weak points
- User-friendly, simplified executive summary
- Risk analysis score with meaningful findings
- Dark web scanning for credentials for sale

60% of SMBs go out of business within six months of a cyberattack.

-National Cyber Security Alliance

A risk assessment isn't a one-and-done endeavor. An assessment can strengthen your overall cybersecurity defense for years to come.
